

509B Reinforced Kraft Union Liner

Product Description

509B adds extra protection to a garden structure by creating a windproof and waterproof outer layer. It is an ideal option for uninsulated garden structure manufacturers or even home owners renovating a current uninsulated garden building. 509B is a fully reinforced high specification bitumen bonded kraft paper laminate. The main specification for this product is based on BS 1521, but for shed linings it is produced with a non-compliant selvedge, or uncut edge finish.

Features

- Specification based on BS1521
- Reinforced

Typical Applications

Windproof and waterproof outer layer for:
