

Polyethylene Backing Rod

Product Description

Closed cell polyethylene foam cord in varying diameters. It's mainly used behind sealants and mastics in expansion joints to provide a backing support where a full depth expansion joint is not required.

Features

- Allows for reduction of sealant and mastics use
- CFC & HCFC free
- Does not rot
- Physically and chemically inert
- Low cost
- Quick and easy to install
- Non absorbent
- Comes supplied on a snag-free cardboard coil

Physical information

	Value
Density	Average 25kg/m ³
Working Temperature Range	-70/+90 °C
Water Vapour Transmission	Less than 4g/m ² /25hr/50mm
Water Absorption	Less than 1% volume after 24hrs
Thermal Conductivity at 20°C	W/mK 0.04

Please note: The above technical information is given as a guide and is based on recent test data obtained under laboratory conditions. Materials should be fully tested by the end user to establish suitability of the product for the intended application. August 2024
